Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments with respect to claims 1-13 and 15-18 have been considered but are moot in view of the new ground(s) of rejection.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-7, 9, 10, 12, 13, and 15-17 are rejected under 35 U.S.C. 102(e) as being anticipated by *Susil et al* (US 2003/0050557 A1).

Susil et al anticipate all claimed features in claims 1-7, 9, 10, 12, 13, and 15-17.

**Claims 1-4 and 13:** Susil et al disclose a method and apparatus probe for detecting magnetic resonance signals emitted from a region of interest including a conducting medium where the conducting medium is a patient's tissue, organ, etc. The probe further includes first and second electrodes positionable on or within the object or patient in proximity to the region of interest where the two electrodes are spaced apart and disconnected (figure 2h; paragraph [0075]).

**Claim 5:** Susil et al disclose in figure 2i where the probe includes two or more (four electrodes).

**Claims 6, 7, 9, 10, 16, and 17:** Susil et al disclose in figures 2e- 2i where the electrodes are carried by a catheter and the electrodes are rings around the circumference of the catheter.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 12 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over *Susil et al.*

Susil et al substantially disclose all claimed features in claims 12 and 15 it does not explicitly teach having the electrodes in the shape of needle form. However, without statements of criticality of the shape of the electrodes it is an obvious matter of design choice to one having ordinary skill in the art at the time the invention was made to form the electrodes of a particular shape or reduce their circumference to such that one of skilled in the art may refer to them as, "needles" such that they may fit on a catheter for insertion into the body.

***Allowable Subject Matter***

6. Claims 8, 11, and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
